

Commands for compiling and uploading C code to the Arduino atmega328p microcontroller.

Example file is named "led.c". Please rename the file in the command accordingly.

1. `avr-gcc -Os -DF_CPU=16000000UL -mmcu=atmega328p -o led led.c`
2. `avr-objcopy -O ihex -R .eeprom led led.hex`
3. `avrdude -F -V -c arduino -p ATMEGA328P -P /dev/ttyACM0 -b 115200 -U flash:w:led.hex`

Please ensure that you are able to compile and upload files to your microcontroller on your personal Laptop before coming to the examination hall.
